AALBORG UNIVERSITY
Department of Computer Science

Software Engineering for AI Systems
Spring 2027

Final Report

Case: Short Anonymised Case Name

Student Name

October 27, 2026

Contents

1 Recommendation **2**

2 Introduction **3**

3 Software Architecture **4**

4 Cloud Continuum **5**

5 Big Data & Data Science Technologies **6**

6 Reflection **7**
6.1 What Changed and Why 7
6.2 Next Steps 7
6.3 AI Usage 7

A Evidence **9**

Chapter 1

Recommendation

One page for a non-technical decision maker: the options, their cost and risks, and what you recommend. Avoid technical terms.

> **Recommendation:** State the decision you recommend in one or two sentences.

Chapter 2

Introduction

Introduce the company problem: the business goal, the users, the data, and the constraint that matters. Describe the system at the level of components and data types, and anonymise names where needed.

Chapter 3

Software Architecture

Your revised Portfolio 1. Copy its sections here as `\sections` and revise them based on peer and lecturer feedback [1].

Chapter 4

Cloud Continuum

Your revised Portfolio 2 [2].

Chapter 5

Big Data & Data Science Technologies

Your revised Portfolio 3 [3]. Dashboards and drift evidence from week 6 may be added here.

Chapter 6

Reflection

6.1 What Changed and Why

Portfolio	Feedback	Change made
P1	...	...
P2	...	...
P3	...	...

Table 6.1: Feedback and revisions.

6.2 Next Steps

What you would do next to take the system to production in a real setting.

6.3 AI Usage

Briefly describe your use of AI tools on this report:

- *Code generation:* ...
- *Grammar and writing:* ...
- *Clarification of technical aspects:* ...

Appendix A

Evidence

Repository, `kubectl` output, pipeline runs, dashboards and other evidence referred to in the chapters.
